100 Airport Rd Gregory SD

Open hours: Monday thru Thursday 7 to 5:30

Roger and Laura Petersen bought Ranchers Livestock Equipment October of 2014 to make Ranchers a locally owned business. We are very excited about being a part of the Gregory business community. It is important to us to support our community and we have done business with 28 local businesses this past year. It is also important to support the Agricultural Community by providing them with quality equipment that benefits their farming and ranching operations.

Right now we have 11 full-time employees and 2 part-time employees. We have dealers in 8 surrounding states plus a dealer in Oregon. With the help of our web page we have made sales across many states and have shipped our equipment all the way to California. As our reputation grows so will our business and we hope to be able to add a couple more full time employees to our staff.

Ranchers has been in Gregory for the last 8 years and has established itself as a thriving livestock equipment manufacturer. Ranchers manufactures only high quality products that will last season after season. Our line of products include bale feeders, calving pens, corral panels, feed bunks, feed panels, creep feeders and many more feeding and containment products. We also do many custom built items. Sometimes people want just a little change to an existing piece of equipment or a catwalk or gate added and we can do that at Ranchers. Roger is an excellent designer and if you have a picture or drawing of something you want built he can design it and have it built for you.
